

## Reading

Archaeologists have found a rare Viking ship burial in Norway. They think a powerful Viking ruler was buried there!

The huge ship was found buried in a farm near Oslo, Norway's capital. Archaeologists used radar to find the ship, as well as eight burial mounds and five longhouses!

Only three other Viking ship burials have been found in Norway. Most of them were found a long time ago.

Viking rulers were sometimes buried in their ships with their gold, weapons and even animals.

However, there probably won't be any treasure here! Thieves stole most of the gold hidden in the huge burial mounds hundreds of years ago.

- 1) Find and copy a word which means people who steal things
- 2) How did archaeologists find this ship?
- 3) What else did they find along with the ship?
- 4) What is the capital city of Norway?
