

Halesowen C of E
Primary School

This week you will notice that we have new home learning grids. We have decided to have a last push on home learning in the 3 weeks before the Summer holiday.

We need children to be practising Maths and language and literacy skills as well as other areas of the curriculum.

Every day there are 2 maths, 2 language and 2 topic activities to choose from. Children chose one of each— whichever they think they can do and will enjoy doing.

You will also notice there are some ongoing learning skills and some life skills they can try too

Please send us some photos of this learning to share on the school website.

Any questions please email:
